

# Elegy and Honk

There are two different versions of the software for this piece. The difference is that one allows for an optional mic input (plus optional and adjustable reverb). The other does not. It's obvious from the file name which is which.

**Mac users** can simply open the file with the ".app" at the end.

**Non-Mac user** (including user who do not want to use a computer for in their performance):

Link is to a zipped folder containing a custom Max file and two audio files used by that file ----->>>>>>

You can simply use the audio files for learning and/or performing the piece.

Alternatively, you can achieve the full functionality of the Mac application by downloading the free "runtime" version of Max/MSP at

<http://cycling74.com/downloads> – or –

<http://cycling74.com/downloads/older/>

**Note:** Max 6 is recommended

## Additional Instructions:

- 1) Once you have downloaded and installed the proper version of the program for your computer and OS ...
- 2) launch the program
- 3) open the file: **ElegyMax.maxpat** or **ElegyMax\_Mic.maxpat**

**NOTE:** In order for either of these files to work, the audio files **Elegy-Honk** and **Donna** must be in the same folder as the Max patch file.

**Non-Computer Option** ... you can use any audio file player to play the file: **Elegy-Honk.aif** and then play along with it.
